Why wait when you could achieve these benefits today?

The Affirm® prone breast biopsy system is designed to significantly improve efficiency during breast biopsy procedures.

- Superior imaging capabilities, letting you see subtle lesions and faint calcifications that may not be visible on older systems.\(^1\)
- Wider field of view, allowing for visualization of more tissue for easy targeting.\(^2\)
- Exclusive, fully integrated lateral needle approach providing access to challenging locations without needing to reposition the patient.
- Faster procedures, helping to optimize radiologist and technologist’s time.\(^1\)
- Superior imaging capabilities that enhance visualization of subtle lesions.\(^1\)
- A better, more comfortable\(^3\) patient experience helping to improve overall patient satisfaction.
- The only prone biopsy system running on a sustainable operating system.
- DICOM support for print, worklist and PACS connectivity.
- Prepared for software upgrade from 2D to 3D™ imaging at any time.
- Designed to provide enhanced patient comfort.
- 95% of patients say it’s faster, more comfortable, and less painful than expected.\(^3\)
- 98% of patients would recommend the clinician and/or facility with the Affirm® prone biopsy system.\(^4\)

\(^1\) Compared to MultiCare® Platinum system
\(^2\) Compared to existing dedicated prone biopsy systems
\(^3\) Survey of 209 patients post-procedure at 3 hospitals, 10 clinicians
\(^4\) Survey of 212 patients post-procedure at 3 hospitals, 10 clinicians
