

Why wait when you could achieve these benefits today?

The Affirm® prone breast biopsy system is designed to significantly improve efficiency during breast biopsy procedures.

- ✓ Superior imaging capabilities, letting you see subtle lesions and faint calcifications that may not be visible on older systems.¹
- ✓ Wider field of view, allowing for visualization of more tissue for easy targeting.²
- ✓ Exclusive, fully integrated lateral needle approach providing access to challenging locations without needing to reposition the patient.

- ✓ Faster procedures, helping to optimize radiologist and technologist's time.¹
- ✓ Superior imaging capabilities that enhance visualization of subtle lesions.¹
- ✓ A better, more comfortable³ patient experience helping to improve overall patient satisfaction.

- ✓ The only prone biopsy system running on a sustainable operating system.
- ✓ DICOM support for print, worklist and PACS connectivity.
- ✓ Prepared for software upgrade from 2D to 3D™ imaging at any time.

- ✓ Designed to provide enhanced patient comfort.
- ✓ 95% of patients say it's faster, more comfortable, and less painful than expected.³
- ✓ 98% of patients would recommend the clinician and/or facility with the Affirm® prone biopsy system.⁴

1. Compared to MultiCare® Platinum system
2. Compared to existing dedicated prone biopsy systems
3. Survey of 209 patients post-procedure at 3 hospitals, 10 clinicians
4. Survey of 212 patients post-procedure at 3 hospitals, 10 clinicians
